Dear Ms. Stoner –

Best wishes for the new year.

Since 1988, Golder Associates has been a world leader in fractured rock hydrogeology, though our FracMan® Discrete Fracture Network simulator ([www.FracMan.com](http://www.FracMan.com)). SeeMyFrac® is a new geomechanical simulator which allows non-specialists to simulate hydraulic fractures in three dimensions. Built on the industry standard FracMan® Discrete Fracture Network engine, SeeMyFrac provides realistic estimates of hydraulic fracture geometry and properties, customized to local geologic conditions. SeeMyFrac® can be used both to design hydraulic fractures for improved gas and oil production, and to minimize environmental risks by understanding the potential for induced hydraulic connections to groundwater resources.

Golder Associates would like to present and explain this technology to the EPA, to support the development of appropriate regulations for hydraulic fracturing activities.

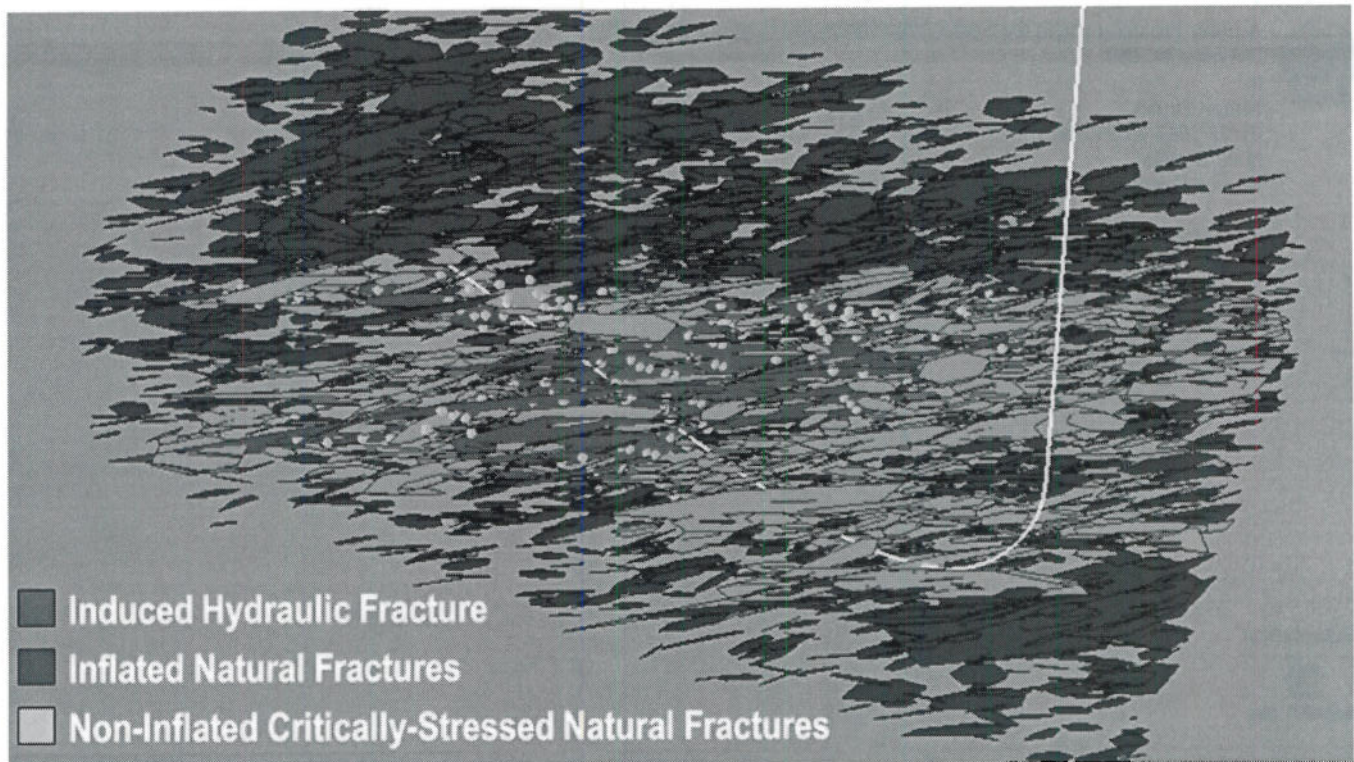

I will be in DC on Wed. Jan 9<sup>th</sup>, and would very much appreciate the opportunity to meet with EPA staff individuals interested and involved with hydraulic fracturing regulation. I would very much appreciate it if you could arrange for this message for be forwarded to your appropriate staff. Please ask them to contact me [derish@golder.com](mailto:derish@golder.com) (206) 910-7991 if they would like to meet with me during my visit to DC.

Thank you very much for your consideration.

Best regards,

Bill Dershowitz
